Boeing North Bridge Replacement Project

All Tenant Meeting

Wednesday, March 20, 3:30 p.m.

Former Chamber of Commerce Building
300 Rainier Ave N

Starting on June 1, 2013, Boeing will be replacing the north bridge. This is a technically challenging project that will span three summers. To construct this project, the contractor will be required to use large construction equipment. Depending on the equipment being used at that location, the Airport will be required to displace the threshold for Runway 16. A displaced threshold reduce the amount of runway available for landing aircraft.

Please attend this meeting to find out more about this project, and to ask your questions. Boeing and Airport representatives will be in attendance.
