

Denis Law Mayor

Dec. 16, 2019

Statement from Renton Mayor Denis Law

Re: Boeing 737MAX

City of Renton Mayor Denis Law is currently out of town, but has issued the following statement in response to reports the Boeing Company is considering suspending operations at their 737 plant in Renton.

“We are aware the Boeing Company has been looking at several options with regards to the 737MAX program and one of those is temporary suspension of production at their plant in Renton.

“We are hopeful that any suspension of production would be for a limited time to minimize any negative impact to local businesses. However any suspension in production will impact local employees, which is very unfortunate, especially during the holiday season.

“We hope that work at the plant will resume quickly if layoffs occur.”
