File Name: H:\CED\PLANNING\GIS\gis_projects\shoreline_mgmt_program\maps\SMP13B_CMZ_cedar_river.mxd

This map depicts the approximate location and extent of areas subject to the SMP. The actual extent of shoreline jurisdiction is determined by site-specific evaluation to identify the ordinary high water mark and any associated wetlands. The location of the 20 cfs limit is from USGS (1998). Floodplain and floodway extent are based on FEMA mapping specific to the post-flood by King County. Wetland locations are approximate and based on existing City/regional inventories; additional wetlands may be present that are not shown on the maps and some of the areas shown as wetlands may not meet the wetland criteria. This map makes no claim as to whether wetlands are associated with the shoreline or not. This map should not be used as a definitive source on associated Wetlands under Shoreline Management Act jurisdiction. Such a determination will be made on a case-by-case basis.
