Guidelines for Aboveground Tank Installation

Separate plans and permits are required for installation of aboveground tanks as required by International Fire Code and City of Renton Ordinance. Submit an electronic copy of this application along with plans, cut sheets, calculations and applicable specifications for review. Hard copy paper plans are not acceptable in any case. All information related to the installation shall be included with the plan review package. A plan review fee is to be paid at the time the plans are submitted, based on the value of the work to be performed. All information and evidence of required licenses are to be provided with the application for permit. All contractors doing work in the City of Renton are required to have a Renton Business License. If the installation is in conjunction with a building permit, the **Building Permit Number** shall be provided at the time of submittal. The **City assigned** street address must be included on the application. The following specific information is required on applications for aboveground tanks for storage and dispensing of Class I, II and III liquids or hazardous materials.

1. A brief, well-written project narrative that describes the entire scope of the project in complete detail
2. Proposed location of the tank on the property, including distance and setback from property lines, permanent or temporary structure(s) and other tanks
3. Specifications of the tank shall include the make, model, capacity, vents, method of mounting, listing on tank, vehicle protection and MSDS of the material to be contained or dispensed.
4. Plans shall also include spill control, drainage control, secondary containment and diking.
5. Pump, dispensing hose, nozzles, emergency shut-off switches and all required safety devices shall be identified on the specification sheets and site plan.
6. Electronic monitoring equipment and cut sheets, to include high level alarm, low level alarm, leak detection, local beacons, audible and/or remote monitoring are all subject to separate plans and permits.
7. Confirmation that the applicant and/or proposal has cleared the necessary environmental and land use reviews prescribed by SEPA
8. Product shall not be loaded into tank until tank installation has been approved and permit is signed by inspector.
9. Removal of aboveground tanks or a change in use is subject to a separate plan review and permit process.
10. Plans will be reviewed and will be either approved, approved with conditions or denied in accordance with the standard plan review procedures.
11. A permit fee will be assessed at the time of permit issuance.

All field tests and/or inspections must be scheduled a **minimum of 24 hours** prior to inspection. Inspection appointments will be subject to the availability of personnel. The contractor must be present at the time of all field tests.
