

sufficient and successful in the personal and professional lives. Thank you, city of Renton, for partnering with us to help make a positive difference to the residents within your community.

City of Renton Highlights:

Ms. K. hails from Cambodia. She came to US at the age of 19 with extremely limited communication skills in English language. It is amazing to see a positive transformation in her - from a shy introvert to a confident young communicative lady. For a person to feel successful, the most valuable thing to develop in oneself is confidence and the constant quest to learn. Her immense hard work, researching capability and dedication to learning has a profound effect on her confidence and attitude - that in itself is a stepping stone for success.

Mr. P. hails from Cameron. He came to US a year back with low confidence in English language skills. Michael is a 55 plus year old student who defies all odds of age and mental barriers to keep learning. A student of less words and more work, his constant questioning nature, punctuality, in-depth learning and focused discipline are success oriented values to be well appreciated. Sky is the limit goes well with Mr. P. "

MSC has a new ESL volunteer instructor in Renton who has been inviting speakers to come into the classroom to enhance instruction delivery. Their most recent guest was a Flight Attendant and this is what she said: "We had a great time in class. We talked about airplanes and travel and I had a friend of mine come. He was a flight attendant for 35 years with United Airlines. The students had a wonderful time asking him questions and having good English conversation. They were having so much fun talking that we skipped the writing part and continued talking."
