

Spring 2024

Kennydale Lakeline Sewer System Improvement Project

Project Update

Dear Kennydale Resident,

We hope you're doing well. Earlier this year, the City of Renton's design team began the final design phase for the Kennydale Lakeline Sewer Improvement Project. The final design phase is expected to last through 2025, with construction tentatively planned to start in 2026.

In this phase, the project team will finalize project designs and conduct fieldwork in the public right-of-way. Fieldwork may include surveying to collect land measurements, geotechnical drilling to explore underground soil conditions, and other work, as needed, to better understand the existing environments where improvements will be made.

As we progress with design work, project team members, including the city's Right-of-Way consultant, LaBonde Land, Inc., will contact residents to discuss project plans, explain new or amended easement needs on the property, and answer any questions.

The Kennydale Lakeline Sewer Improvement Project is critical to ensuring the long-term durability and function of your home's sewer system. The city will host an open house in the coming months to answer questions about the project and demonstrate how the grinder pumps work. We want homeowners to continue to be active partners in this project. Once details have been finalized, you will receive an open house invitation.

If you have any questions about the project, please contact Anousheh Nawaz via email at anawaz@rentonwa.gov or phone at (425) 757-9156.

Sincerely,

Martin Pastucha
